IKA PETTE Classic Kit

/// Data Sheet

The IKA PETTE Classic Kit pipette package covers a volume range of 2 - 1000 µl, sufficient for fulfilling the needs of most laboratories.
The package consists of three single channel pipettes with variable volumes, a complimentary stand that holds up to three pipettes and two pipette tip boxes. This makes it a convenient starter package for researchers.

FEATURES:
- Mechanical air-cushion pipettes manufactured in Germany
- Fully automated calibration by robots

IKA

designed for scientists

- Volume-locking feature to prevent any accidental volume changes
- Large and clearly visible display
- Ergonomic and lightweight pipette with low pipetting and tip ejection forces to reduce strain and fatigue
- Durable and robust construction using high quality UV resistant and chemical resistant materials
- Fully autoclavable to ensure sterility and compliance to stringent laboratory standards
- Maximum user convenience with tool-less disassembly and calibration adjustment for regular maintenance
